

Contract Mining

Expertise

Complete range of mining and earthmoving services

Resources

Extensive and diverse range of modern plant and equipment

Safe & Reliable

Excellent safety record and ability to deliver on time

Lucas have the experience and resources to tackle the largest and most challenging mining projects.

Many leading mining companies rely on Lucas to undertake major mining and construction works for mines under development and ongoing mining operations in some of the most remote parts of Australia.

Our services are increasingly in demand as new mines are commissioned and miners seek to build infrastructure quickly, safely and cost-effectively within tight timeframes and get mines into production.

Many years of involvement in the industry means we deliver on all occupational health and safety expectations, operational and technical requirements, and are used to working with all stakeholders, including clients, government agencies, suppliers and local communities.

Range of services

Lucas have the expertise, personnel and heavy equipment to cover all service areas including:

- **Contract mining**
- **Complete service from resource to ship**
- **Bulk earthworks**
- **Overburden and topsoil stripping**
- **Drilling and blasting**
- **Loading and hauling ROM materials**
- **Crushing and processing**
- **Construction and reclaiming of stockpiles**
- **Bulk commodity, ore and concentrate haulage**
- **Tailings dam construction**
- **Mine and quarry development and maintenance**
- **Rehabilitation and re-vegetation**
- **Mine infrastructure**
- **Construction, upgrading and maintenance of haul roads and mine access roads**

Lucas are the preferred choice of many leading mining companies because we are reliable, we meet deadlines and we have an excellent safety and environmental record. We are also well-equipped to overcome the unexpected – even in the remotest of areas.

Pivotal to our ability to deliver successful projects is our experienced team of project managers, engineers, supervisors, surveyors, shottirers, operators and drillers, together with our own on-site maintenance facilities headed by experienced managers supported by well-trained diesel fitters, boilermakers and trades assistants.

Lucas operate three 8-seater and 10-seater turbo prop aircraft to ensure fast and convenient access to remote projects, and an ability to dispatch parts, supplies and undertake crew changes on demand.

Lucas are a multidisciplinary contractor and are committed to employing local people in regional and remote areas to support our permanent staff.

Recent mining projects

Exco Resources Poly Metals White Dam – Gold mining operation where contract mining services included topsoil stripping, drill and blast, load & haul waste and ore, processing and civil works for mine infrastructure.

Iluka Jacinth-Ambrosia Mine – One of the world's largest mineral sands mines 270km west of Ceduna. Services included 95kms roadworks, mining, permanent village, airstrip, bulk earthworks, civil works including concrete and underground services for the entire process facility.

Iluka Jacinth-Ambrosia Mine – Extensive test pit trials near Ceduna to establish the best mining and processing methodologies for one of the Largest Zircon Mines in the world.

Oz Minerals, Prominent Hill – Topsoil stripping, airstrip, bulk earthworks, 140km of mine site access and concentrate haul roads, tailings storage facility and process plant civil works for the copper-gold mine, 650 km north-west of Adelaide.

Termite Resources, Cairn Hill – Magnetite project near Coober Pedy. Services included overburden stripping, drill and blast, load and haul, crushing of iron ore and construction of an underpass on Stuart Highway.

Holcim – Load and haul, overburden stripping, plant hire and crushing.

Onesteel, Ardrossan Dolomite Mine – Contract equipment supplier for load and haul, overburden removal, shiploading, rehabilitation works, blast hole drilling, crushing, labour and plant hire services.

About us

With an extensive and dedicated workforce of qualified and experienced staff, and one of the largest plant and equipment fleets, no project is too large or challenging.

Lucas maintains a high level of integrity, favourable community relations and environmental responsibility in all our operations and will not compromise on safety in our delivery of productive and efficient services ensuring we exceed client expectations.

Safety is a core corporate value and is integrated into all Lucas processes. We are accredited to ISO 18001 and the Australian New Zealand Standard 4801 for Occupational Health and Safety Management Systems.

Our commitment to safety is demonstrated by high safety standards instilled within our company, this has ensured that Lucas has an enviable safety record.
